Dear EOS Customers and Global Channel Partners,

In continuation to our efforts to keep you posted about the developments in India and EOS Power, we would like to inform you that the national lockdown, which was scheduled to end today, April 14th, has been further extended till May 3rd. The Indian Prime Minister, Narendra Modi, announced today that social distancing is the only way to avert the spread of Covid-19 in India.

EOS Power has been serving the Medical Industry for many years and is glad to advise that it has received a special approval to commence the production activities for medical power supplies with limited work force and with the stringent conditions which needs to be adhered to of like maintaining social distancing and safety of all employees while coming to factory and working. Approval from the India Government is granted in view of to keep manufacturing of power supplies for highly needed devices, such as Ventilators, Respiratory Systems, Hospital Beds, etc. in an effort to fight Covid-19 and is considered as essential goods.

EOS is maintaining a high level of Safety and Social Distancing for its employees who are able to come to work within the proper guidelines set by the Government Health Department.

With the limited people available we are working on plans what best we can do in this situation to support medical customer requirements. Commuting to work, inward logistics to get raw materials and outward logistics for exports are still issues, but we are doing our best.

We are grateful to all our Employees, Customers, Government and Law Enforcement agencies for providing the necessary help and support during this difficult time.

We also thank our valued customers for their patience.

With EOS executing on best practices during this global crisis, we are certain our contributions will continue making a difference for all our Global Medical Customers and patients that depend on them to save their lives.
Wish you good luck and stay safe

Best/VG

Thanks & Regards
Vijay Gujarathi
