May 15, 2020

Subject: COVID-19 Outbreak – Updates on 766, 767, 768, 752 and 753 series resistor network

Dear valued customer

Malaysia sees many positive developments in its fight against COVID-19, the efforts have not fully succeeded. As such, the Movement Control Order (MCO) has been extended for a further month until June 9. This is a fourth extension.

Although CTS is granted a 2-shift waiver from the authority, non-essential businesses and schools are still shut. Domestics and International travel are also prohibited. As a result, the attendance of our operators and technical experts are way below the expectation.

We would also like to inform that it is the holy month of Ramadan in Malaysia until May 23rd, 2020 and follow by Hari Raya Aidilfitri on May 24th, 2020 to May 25th, 2020.

We will continue to monitor closely and update you on the situation. Given the pandemic, CTS also like to emphasize that priority is and have to be given to medical-related orders.

For more information, please contact your Sales Support or email to ECSalesSupport@ctscorp.com.
