June 9, 2020

Dear Valued Customer,

Following up on our letter of May 12th, the following is an update on the operational status of Vishay’s manufacturing facilities as a result of the Covid-19 pandemic. As of today, Vishay factories in the following countries continue to experience some level of significant production disruption:

- Mexico – with capacity increase since 5/12
- India – with capacity increase since 5/12

No new countries have been added to the above list, and the situation at our plants in both Mexico and India continues to steadily improve. Your local Vishay sales contacts can provide further detail on which Vishay products are manufactured at these locations (and it should be pointed out that there may be more than one facility in some countries), and with regards to how these disruptions will impact your specific orders. All other Vishay facilities worldwide remain fully operational, or have been impacted relatively minimally by Covid-19.

Thank you for your understanding.

Regards,
