# GoClass

It is the policy of Broadcom Inc. to comply with the international trade regulations of the countries in which we operate. Classification is the process of properly assigning import (HTS) and export (ECCN) control codes to product. These codes are required whenever items cross international borders to control sensitive products and technology and determine appropriate duty rates. GoClass performs the classification function and provides a part-look-up view for any parts for trade-compliance attributes and reporting.

Note to External Users: All Export Control Classification Numbers (ECCNs) and Harmonized Tariff Schedule (HTS) numbers provided herein reflect Broadcom Inc.'s current interpretation of the US Export Administration Regulations, US Harmonized Tariff Schedule and other countries' regulations and tariff schedules, and are subject to change without prior notification. It is the obligation of the exporter to comply with applicable U.S. export control laws and to provide classification information at the time of export. Broadcom Inc. makes no representation as to the accuracy or reliability of these ECCNs and HTSs, and is in no way responsible for any damages or penalties suffered by other parties as a result of using or relying upon such information.

### Part Look Up

- To view part details, please enter the part #.
- You can use "%" for wild card search, ie NPN% will search for all parts starting with NPN.
- Wildcard searches could be slower than exact part search.
- Your search will give Max of 7500 results.
